Tooth decay, also known as dental caries or cavities, is a breakdown of teeth due to acids made by bacteria. The cavities may be a number of different colors from yellow to black. Symptoms may include pain and difficulty with eating. Complications may include inflammation of the tissue around the tooth, tooth loss, and infection or abscess formation.. The cause of caries is acid from bacteria ...

Tooth loss is a process in which one or more teeth come loose and fall out. Tooth loss is normal for deciduous teeth (baby teeth), when they are replaced by a person's adult teeth. Otherwise, losing teeth is undesirable and is the result of injury or disease, such as dental avulsion, tooth decay, and gum disease. The condition of being toothless or missing one or more teeth is called edentulism

The origins of butter go back thousands of years to when our ancestors first started domesticating animals. In fact, the first written reference to butter was found on a 4500- year old limestone tablet illustrating how butter was made. 1 In India, ghee (clarified butter) has been used as a staple food, and as a symbol of purity, worthy of offering to the gods in religious ceremonies for more ...
