likely to study science in the future and persist in science classes. Nieswandt (2007) did not find direct effect of attitudes on achievement but found an indirect connection in longitudinal data. Interest in science has been linked to future enrollment in science courses and pursuit of science related careers (Sinclair, 1994).

Toward a Science of Translating, first published in 1964, is still very much in demand today.

Toward a Science of Translating: With Special Reference to

Toward a Science of Translating, first published in 1964, is still very much in demand today. Written by a linguist and anthropologist with forty years of experience in the field of language and religion, this work describes the major components of translating; setting the translating into the context of historical changes in principles and procedures over the last two centuries.
