The history of the personal computer as a mass-market consumer electronic device began with the microcomputer revolution of the 1980s. The 1981 launch of the IBM Personal Computer coined both the term Personal Computer and PC. A personal computer is one intended for interactive individual use, [citation needed], as opposed to a mainframe computer where the end user's requests are filtered ...

Terminology "PC" is an initialism for "personal computer". The IBM Personal Computer incorporated the designation in its model name, but IBM has not used this brand for many years. It is sometimes useful, especially in a marketing context, to distinguish personal computers of the "IBM Personal Computer" family from personal computers made by other manufacturers.
