Energy is a critical issue for Africa, where large number of people do not have access to energy. Energy recovery from waste can play a role in minimising the impact of Municipal Solid Waste (MSW) on the environment with the additional benefit of providing a local source of energy.

## **Evaluation of energy potential of Municipal Solid Waste**

sorting and this happens at disposal sites too. But some scavengers at landfill sites practice an informal type of waste recovery. Other op-tions like energy recovery and composting are

Construction & Demolition Waste Manual Prepared for NYC Department of Design & Construction by Gruzen Samton LLP with City Green Inc. May 2003 City of New Yor

## **Construction & Demolition Waste Manual**

Recycling is the process of converting waste materials into new materials and objects. It is an alternative to "conventional" waste disposal that can save material and help lower greenhouse gas emissions. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution (from incineration), and water ...

1. Introduction. Currently fossil fuels are the most reliable sources of energy, meeting almost 84% of the global energy demand (Shafiee and Topal, 2009).It is the time to realise the potential of waste to energy (WTE) as an option for sustainable solid waste management and as one of the most significant future renewable energy sources, which is economically viable and environmentally ...
